Interview Quick Tips (Audio)

The Interview:-

- Ask open-ended questions: Tell me about ... I'm curious about … Describe …
- The less you talk and the more your interviewee talks the better.
- Ask your question then keep quiet (don't giggle or respond with uh-huhs or yeahs).
- If your interviewee isn't relaxed, ask a couple of "throwaway" questions to get them warmed up.

Technical:-

- Record the interviews in a quiet location away from crowds of people (not next to a freeway or anywhere with lots of background noise).
- Make sure your interviewee is comfortable and sitting or standing still.
- The audio recorder should not be more than half an arms length away from your interviewee (the closer the better).
