Media Arts Contract & Equipment Use

1. Acceptance of responsibility for equipment/camera use

I, _____, am the parent/guardian of
(printed name please)

_____ (Student),
(printed name please)

hereby give permission for my child to use LAUSD media arts equipment (cameras, computers, chemically-based darkroom, animation equipment, etc.).

Period # of the Media Arts class in which he/she is enrolled: Per # _____

I also give permission to my child to use the school's equipment on and off campus and accept responsibility if the equipment is damaged or lost due to mishandling/misuse. (Intermediate/advanced students may be allowed to borrow cameras for off-campus use.) My child and I understand that the camera must be used responsibly according to Mr. Shipley's rules (see attached list). We also understand that if those rules are not followed, my child may lose camera privileges. If the LAUSD-owned camera is broken or lost while on loan due to mishandling/misuse, I understand that I will be held financially responsible for its replacement.

Care And Maintenance Of A Digital Camera

Grand Arts, Ramón C. Cortines School of Visual & Performing Arts / LAUSD

1. **Give your camera TLC (tender loving care)!**
2. **Always carry it using wrist or neck strap.** (Be ESPECIALLY careful NOT to drop or bump on the concrete!!!)
3. **Never use force to adjust anything on the camera.** Handle all moving parts - buttons, switches, levers, lenses, etc. - with care.
4. Turn off the camera before disconnecting the power source or a cable, or (for your own camera) removing the battery or memory card. NEVER remove school memory card or battery!
5. **Beware of the stairs!** When photographing, your awareness is divided so you are more susceptible to accidents. PLEASE be very careful near our very tall concrete stairs!!! Attention skaters/daredevils: No acrobatics near or on the stairs!
6. **"NEVER hand the camera YOU checked out to another student"** Each time you sign out a camera for on-campus use, YOU are responsible. When you sign a camera out, the camera is signed out ONLY to you or your partner, not to anybody else at school.
7. **"drowning in a drop of water …"** Never allow any liquids (water, soda …) or chemicals such as sunscreen, to contact camera surfaces. If you suspect water has gotten inside the camera, remove the battery and memory card and allow all components to air-dry for at least 24 hours before using the camera.
8. **"blinded by a speck of dust in the camera 'eye' …"** Never allow dust of ANY kind (… dirt, sand … etc. etc.) to touch the camera surface. To avoid, NEVER put a camera directly on the ground or any surface, even cloth, that has dust or sand on it.
9. **"beware of the beach! …"** (water & sand, oh my!) (Eventually, we'll check out cameras overnight) Cameras get sun (& sand) burned too! Keep your camera out of direct sunlight. Never set a camera or camera bag on a beach towel since it almost always has some sand on it. Even small amounts of sand or dirt can scratch or damage a camera.
10. **photographing in the rain** … only under cover … If it suddenly rains or drizzles while carrying your camera, slip it under a jacket, sweater or, if small enough, put it in a pocket. You may be tempted to use it, but don't unless you have protection overhead.
11. **cleaning NEVER clean school cameras, we'll take care of that!** Cleaning your own camera: Blow very lightly (no spit!) on the lens or LCD to get rid of dirt and dust. Regularly clean including the lens and LCD but be careful to follow these instructions: Always wipe softly with a lint-free and soft cloth or lens cleaning tissue. Never use clothing or solutions unless they are made particularly for digital camera lenses and LCDs. Cleaning incorrectly can actually do more harm than good to a camera; for example, if you use the wrong cloth or solution you can permanently scratch or damage the lens or LCD.
